Quantum Innovation Partners with Vectra AI to Deliver AI-Powered Threat Detection and Response

Strategic partnership brings advanced AI-driven network detection and response capabilities to the Middle East

Riyadh, Saudi Arabia, [Date] – Quantum Innovation, a leading cybersecurity solutions provider, today announced a strategic partnership with Vectra AI, a leader in AI-driven threat detection and response for hybrid and multi-cloud enterprises. This collaboration will deliver Vectra AI's cutting-edge network detection and response (NDR) platform to organizations across the Middle East region.

Vectra AI's Cognito platform uses artificial intelligence and machine learning to detect and respond to cyber attacks in real-time across cloud, data center, and enterprise networks, providing security teams with unprecedented visibility and automated threat prioritization.

"Traditional security tools struggle to keep pace with sophisticated attackers who use advanced techniques to evade detection," said Adnan Habib, Founder and CTO of Quantum Innovation. "Vectra AI's platform leverages artificial intelligence to detect attacker behaviors and techniques that other solutions miss, providing our clients with a significant advantage in defending against modern cyber threats."

The partnership addresses critical security challenges facing organizations today:
- Alert fatigue from too many false positives
- Limited visibility across hybrid and multi-cloud environments
- Inability to detect sophisticated attack techniques
- Shortage of skilled security analysts
- Need for faster threat detection and response

Vectra AI's Cognito platform continuously analyzes network traffic and entity behavior to identify hidden attackers and prioritize threats based on risk and impact. The AI-driven approach enables security teams to focus on the most critical threats while automated response capabilities help contain attacks before they cause damage.

"Quantum Innovation's deep expertise in cybersecurity and strong presence in the Middle East market makes them an ideal partner to deliver our AI-powered security solutions," said [Vectra AI Executive], [Title] at Vectra AI. "Together, we will help organizations in the region leverage artificial intelligence to strengthen their security posture and respond to threats with unprecedented speed and accuracy."

Through this partnership, Quantum Innovation will provide:
- Assessment and deployment of Vectra AI Cognito platform
- Integration with existing security infrastructure
- Managed detection and response services
- Security operations center (SOC) augmentation
- Training for security teams on AI-driven threat hunting

This collaboration reinforces Quantum Innovation's commitment to bringing innovative, next-generation security technologies to organizations across the Middle East.

About Vectra AI
Vectra AI is the leader in AI-driven threat detection and response for hybrid and multi-cloud enterprises. The Vectra platform uses AI to detect attackers in real-time and perform conclusive investigations of threats. Organizations worldwide rely on Vectra to stay ahead of modern cyber attacks.

About Quantum Innovation
Quantum Innovation is a trusted, global partner delivering mission-critical cybersecurity training, certifications, and advanced technology solutions to organizations, with presence in Saudi Arabia, UAE, and Australia. Visit https://www.quantuminnovation.com or email a.habib@quantuminnovation.com.
